

Expo Management System

Abstract:

The Expo Management System is an innovative online platform designed to streamline the management of expos, providing dynamic booth allocation year after year. The system offers features such as online ticket purchasing, computerized format for shops and ID cards, and a digitalized entrance ticket process. It facilitates a seamless experience for both exhibitors and attendees, offering online registration for companies, online application form submission, and efficient booth allocation.

1.Dynamic Booth Allocation Module:

Description: Manages the dynamic allocation of booths for expos, ensuring a flexible and efficient system for exhibitors year after year.

2.Online Ticket Purchase Module:

Description: Allows users to purchase expo tickets online, providing a convenient and digitalized approach for attendees.

3.Online Company Registration Module:

Description: Enables companies to register through an online application form, streamlining the registration process for expo participation.

4. Online Application Form Submission Module:

Description: Facilitates the submission of application forms online, reducing paperwork and ensuring a more efficient application process.

5. Expo Conducting Place Information Module:

Description: Provides detailed information about the expo conducting place, including venue details, layout, and any relevant information for exhibitors and attendees..
